

# TL600

Childproofing Fingerprint Smart Door Lock  
Supporting Remote Control and Monitoring with an App

Touch To Open

Wi-Fi Communication  
No Extra Gateway Needed

## Product Introduction

TL600 is a smart door lock with a digital keypad, Wi-Fi communication, and other verification methods, including fingerprint verification.

By connecting the intelligent door lock to the router via the ZSmart App, users could quickly check alarm and unlock records, share a temporary or dynamic password with their friends and relatives, and manage multiple user accounts at ease.

It is suitable for private houses, apartments, and short-term rentals. And it definitely raises the level of convenience and security control over access to your home.

## Features

-  **Works With ZSmart APP**  
Manages and controls multiple locks at the same time
-  **Class-C Cylinder**  
Provides higher level of security and protection
-  **Anti-theft Design**  
Prevents opening door through the peephole
-  **Random Password**  
Secures your passwords from being exposed by latent prints remain on the device's surface
-  **No Gateway Required**  
Using usual home routers is enough; no other gateway required
-  **Temporary Password**  
Shares a digital password within valid time to visitors unlocking

## Configuration
